From onboarding a Customer to managing his entire relationship life cycle, ModeFinServer products manages every sphere of financial transactions on delivery channels, and initiate financial inclusion programs.

Core Banking Solution

For Banking and Financial sector, the company has developed a Core banking application software product "ACCFINA – CBS", that automates every aspect of a bank's operation - uniting front, middle and back-office processes in real-time

Mobile Banking Solution

Technology to enable Banking Services on Mobile Channels e.g. USSD, HTML5, Downloadable Mobile Apps (Android, iPhone, Windows). It offers flexibility to do financial activities at fingertips, anytime and anywhere.

Internet Banking Solution

Internet banking is one of the most effective channels to enable the bank's customers to perform banking transactions from the convenience of their homes and offices. It provides the customers convenience, effectiveness, reliability and recognition.

Agency Banking Solution

Agency Banking is the system which allows commercial outlets like shops and supermarkets to act in some capacity on behalf of formal banks and financial institutes. Agent Services includes Cash-In, Cash-Out, Account Opening etc.

The products are designed to run on popular industry platforms, and can be customized based on clients requirements. Ease of installation and maintenance are key advantages of all ModeFinServer products. ModeFinServer Product suite provides a holistic and integrated approach, complete with solutions and services to give clients a significant competitive advantage.

Mobile Wallet Solution

In the age of smartphones, carrying wallets has become redundant. Credit/Debit cards, currency and other monetary items are done away with while using our mWallet solution. Your Mobile is your currency – our mWallet brings a host of transactions at your fingertips.

Mobile POS Solution

Mobile POS (Point of Sale) is the Technology Solution to enable your Merchants to acquire Card Transaction using Mobile Application instead of investing in costly traditional POS machines.

mVisa and MasterPass Solution

It is a mobile payment solution that will let customers make payments to merchants using mobile app just by scanning the merchant's QR code or by entering the merchant's mVisa / MasterPass ID.

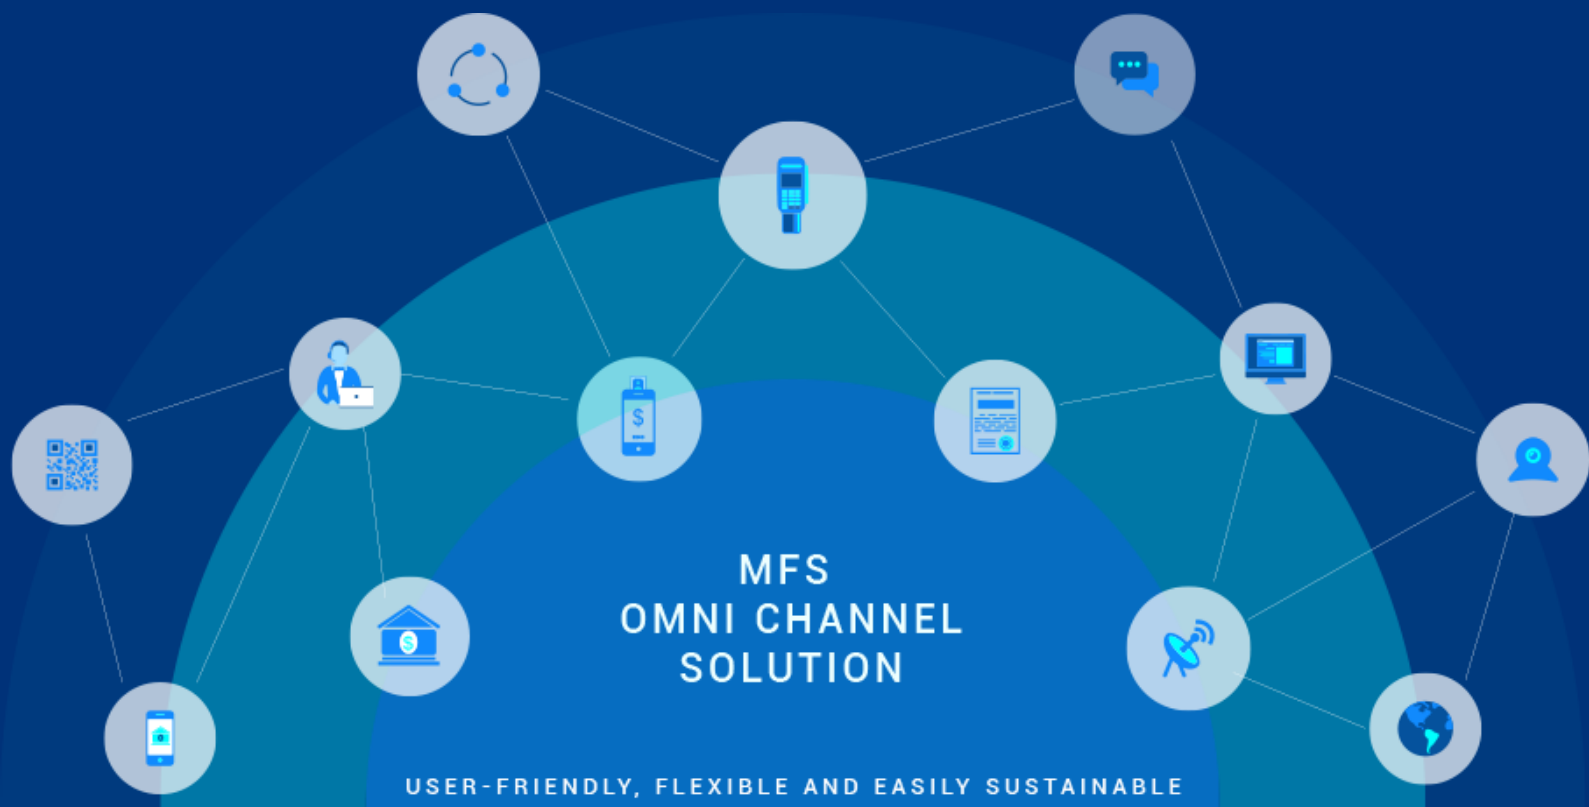

Micro Saving and Micro Lending

Technology to enable Mobile based Saving Solution for Banks, Mobile Wallet Operators with Advance Interest calculator, Distribution & Logistics Management, and Service & Performance Management.

Technology to enable Mobile based small value Lending Solution for Banks, Wallet Operators with Interest calculator & reminder for payments and Distribution Management.

Digital Banking landscape is fast changing and banks often require market-proven electronic retail banking products that enables them launch new services to their customers. Besides improving customer convenience and time-saving methods, banks also strive to improve their profitability by deploying innovative value-added services on the existing system.
